WATER INSTALLATION GUIDE

1. Standard installation demonstration

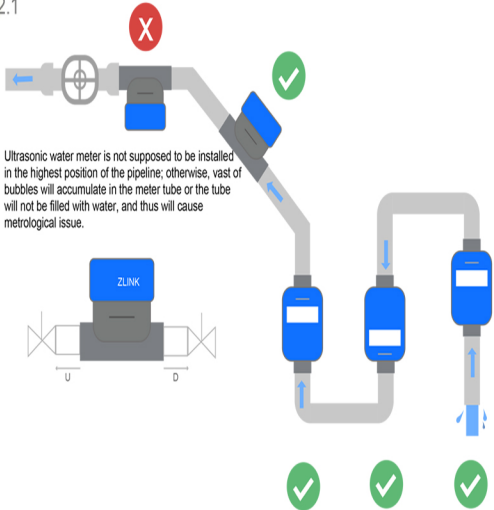

2.2

Ultrasonic water meter is not supposed to be installed higher or even the same height of the faucet; otherwise, the tube will not be filled with water, and thus will affect metering accuracy.

2. Installation position requirement

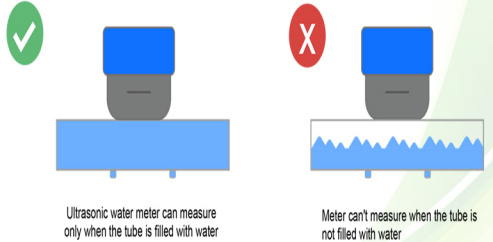

2.1

Ultrasonic water meter is not supposed to be installed in the highest position of the pipeline; otherwise, vast of bubbles will accumulate in the meter tube or the tube will not be filled with water, and thus will cause metrological issue.

3. Meter installation status

Short Code	Function
600	Total water consumption
601	Meter balance
604	Meter Number
612	Cancel Alarm

Ultrasonic water meter can measure only when the tube is filled with water

Meter can't measure when the tube is not filled with water
